Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Upon review of applicants amendment 07/05/2005, a restriction/election of the claims is warranted. Any inconvenience to applicant is regretted.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 40-42, drawn to a process a process of exception reporting in a vehicle, classified in class 701, subclass 204.

II. Claims 83-91, drawn to a process of monitoring a vehicle using GPS system, classified in class 701, subclass 213.

III. Claims 52-54, 56-58, drawn to a system of monitoring vehicle location, classified in class 340, subclass 991.

IV. Claims 60, 71, and 81, drawn to a vehicle system using GPS data to note an exception, classified in class 701, subclass 214.

3. The inventions I/II and III/IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by a materially different apparatus or by hand, such as a navigation apparatus that detects the error signals, wherein such errors may cause serious problem in navigating an aircraft to a waypoint.

Art Unit: 3663

4. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II are directing to different functions.

Invention I related to a process of receiving a parameter of a vehicle such as the time that the vehicle is in motion, and if the parameter is out of a range of acceptable value, an exception is noted. The invention II directs to a vehicle for a vehicle using GPS to generate an actual value of GPS data, and if the actual value does not equal to one of acceptable values, an exception is noted.

5. Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions III and IV are directing to different functions.

Invention III is related to a vehicle monitoring system using the location data received to be compared with a desired location, and a processor is included to note an exception if said location data is beyond a predetermined distance from the desired location. The invention IV directs to a vehicle system using GPS data received from a GPS receiver to generate an actual value of GPS data, and if the actual value does not equal to one of acceptable values, an exception is noted.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3663

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3663
